AMENDMENTS TO THE SPECIFICATION

Please amend the following paragraphs accordingly, wherein deletions are marked with
~~strikethrough~~ or [[double brackets]], and insertions are marked with <u>underlining</u> or --double
dashes--.

Please amend the paragraph that begins on page 13, line 4 as follows:

The computer of the system can also be configured to electronically scan the
plurality of assets, interview members of the organization to identify the plurality
of assets, and/or manually identify the plurality of assets. In the computer, the
plurality of assets can be defined to be one of a user type, a user population type,
a data type and a network type in addition to the electronic type and the location
type. The [[he]] user type relates to an individual user, and the user population
type relates to a group of users.

Please amend the paragraph that begins on page 13, line 11 as follows:

The computer of the system can also be configured to establish at least one
relationship between the plurality of assets. The computer can also be further
configured to link a first asset ~~define~~ <u>defined</u> to be in one asset type with a second
asset defined to be in another asset type and/or to link a first asset ~~define~~ <u>defined</u>
to be in one asset type with a second asset defined to be in the same asset type.
The <u>computer</u> can further be configured to identify one or more inventoried assets
that relate to the identified criterion based on the at least one established
relationship between the plurality of assets.
